SEED GROUP

## KLONDIKE

### Winter Yellow Pea

#### FEATURES AND BENEFITS

Klondike, bred by the USDA-ARS and offered by Montech Seed Group, is the first winter pea variety specifically designed for whole use or as a component in human food. Klondikes have demonstrated success throughout the winter wheat growing areas across Montana.

#### Klondike offers several advantages:

- Early flowering, offering yield gains similar to that seen between spring wheat versus winter wheat.
- Fall seeded, optimizing time management for other crops in the spring season.
- Uniform seed size and color that will fit most market segments.
- High protein levels which may be favorable in the marketplace.

### Try Higher Yields – Try Klondike!

#### 2023 Idaho Winter Pea – Moscow

Variety	3 Year Avg lb/a	Plant Height Index (0-1)	Flowering	Shatter (%)
Klondike	3,995	.62	6/3	0
Windham	3,944	.62	5/30	20
Keystone	3,775	.63	5/30	16

#### CHARACTERISTICS

Powdery Mildew	Resistant
Seed Coat	Clear
Plant height	55.5 cm
Pod height	52.7 cm
Days to Maturity	281.4
Nodes at 1st bloom	19.7
Leaflet type	Semileafless
Pod shape	Straight
Seed shape	Smooth round
